

Add-Ons

Easily expand your VitalPBX's functionalities with the use of Add-Ons. These add even more features, so that you can have a better experience and performance on your PBX.

Part of the VitalPBX Family of applications

Meet the VitalPBX Family of Applications

@VitalPBX

www.vitalpbx.org

Release the full potential of your VitalPBX with our lineup of Add-Ons.

For more information visit: www.vitalpbx.com

Multi-Tenant

\$500 - \$2000

Create and manage multiple clients for one single installation of VitalPBX. Create fully featured tenants that will behave as if they were individual PBX installations.

IVR Stats

\$100

Measure the selection of options in your IVRs. IVR stats will check how many times an option is pressed for IVRs generating statistics.

Geo Firewall

\$75

Protect your VitalPBX installation from unwanted interaction. The Geo Firewall add-on will allow you to block the access to your PBX from any country you choose from.

Paging Pro

\$85

Take the Paging and Intercom module to the next level. Automate your paging announcements by scheduling when you want the paging to occur.

OpenVPN

\$60

Have your VitalPBX Server work as a VPN server and provide a secure connection to your endpoints. Create certificates for your phones, computers, and other VitalPBX Servers.

Queues Callback

\$150

Allow the customer to leave the Queue and be called back automatically whenever the next agent is available and lower hold times.

Virtual Faxes

\$100

Send and receive faxes directly from the Web UI. Create Virtual fax devices and assign them to users so they can send and receive faxes directly from the Web Interface.

Maintenance

\$50

Add recurring maintenance to the storage on your VitalPBX installation. Delete Old CDR records and recordings, and convert the recording files from WAV files to MP3.

Rebranding Module

\$50

Give your PBX your own style and image. Customize options such as Desktop and Mobile view Logo, Video Conferencing Server URL and Social Media Links and more.
